Psalm 127:3-5
Behold, children are a gift of the Lord; the fruit of the womb is a reward. Like arrows in the hand of a warrior, So are the childrend of one's youth, How blessed is the man whose quiver is full of them, They shall not be ashamed, When they speak with their enemies in the gate.

Poly-Flex™ Polyethylene LLDPE provides flexibility and durability required to transport water and chemicals. This tubing has a better resistance to stress cracking than low density polyethylene. Polyethylene LLDPE tubing prevents problems in transfer lines by resisting cracks and tears by metal, plastic, compression and barbed fittings. Available in Opaque and Translucent. **This is a rigid tube, not as flexible as the Poly-Flex Vinyl.**

Poly-Flex™ Vinyl is a poly-vinyl chloride resin material. The extrusion process produces a **highly flexible material** with a smooth bore. PVC is highly resistant to oxidation and an array of chemicals, including strong acids, alkalis and bacteria. PVC accepts a variety of fittings and clamps. It conforms to all industry standards including FDA, USDA, and NSF.

Poly-Flex™ EVA is a blend of 85% ethyl vinyl acetate and polyethylene materials. The extrusion process produces a flexiable smooth bore material that has good impact strength resistance at temperature ranges between -105°F and +160°F. EVA is resistant to oils and most acid/alkali chemical compounds. This tubing is recommended if you need high chemical resistance.

Dura PEX Tubing: This tubing is processed through an electron beam in order to enhance the mechanical properties over conventional polyethylene. Dura-Pex is pliable and can be easily straightened after removal from the coil. Dura-Pex is chlorine resistant and has greater dimensional stability than other tubing. Dura-Pex requires fewer fittings than a traditional rigid plumbing system like copper and is easier to install.

Operating Pressure Limits:
Water: 160 PSI @ 73° F
100 PSI @ 180° F

Kynar PVDF tubing is a flexible, high grade Kynar PVDF tubing that is one of the purist of all commercial resins, making it ideal for applications where compliance to most agency regulations is required. Nycoil tubing is one of the toughest tubing materials and offers extremely good chemical resistance. This tubing can be used where PTFE was once considered the only option at a fraction of the cost.

Hi-Chem™ (EPDM)

Manufactured from Ethylene Propylene Dieneterpolymer resins. EPDM exhibits high tensile strength & flexibility with a low co-efficient of thermal expansion. It is resistant to UV radiation, weathering & microbes. It can be used with most weak to strong alkaline solutions and weak to medium acids.

Santoprene®

Offers good mechanical properties under a wide range of operating temperatures. Highly durable, it is resistant to fatigue, ozone, ultraviolet, acids, alkalies, water, and most oils and lubricants. It has outstanding use with detergents and sanitizers. Color is natural (tan).

Flexon™(PVC)

A highly flexible PVC material that has superior elongation, high retention memory and flex qualities for extended peristaltic pump tube application. Excellent chemical resistance to most chemical agents.

Norprene®

Fomulated to withstand extreme temperatures. Even following extended exposures to heat and ozone it will not crack or deteriorate, as commonly found when using traditional rubber tubing. Its excellent flexural fatigue resistance makes it a good choice for use in peristaltic pumps often found in dispensing equipment. When harsh sanitizing solutions are used, it exhibits exceptional chemical resistance and is entirely unaffected by a wide variety of cleaning solutions.

Silicone

A peroxide cured silicone process is used to extrude a highly useful silicone tube. Surface properties, both inner and outer, resists sticking and encrustation. Silicone will not support bacterial growth. The tubing is soft and pliable. Silicone can be used with most acid and alkaline solutions, but should not be used with solvents and oils. Highly recommended for "Rinse Aid" which tends to draw moisture from tubing and making it brittle. Silicone does not contain moisture.

Fluoro-viton

Is an ideal choice and top performer in a range of applications including automotive, chemical processing, aerospace and industrial markets. The rubber is ideal for these applications because of its ability to resist high temperatures, destructive chemicals and harsh environments

Norprene® Bi-Wall

High performance co-extruded product specifically formulated to provide an ideal combination of chemical resistance and pump life. Its inert ultra-smooth plasticizer-free bore resists the absorption/adsorption of aqueous fluids while the Norprene outer jacket provides long life in peristaltic pumps. The inner liner significantly increases the chemical resistance and allows for a broader range of usability. The tubing is virtually unaffected by acids, bases, salts, ketones and alcohols allowing its use in a wide range of chemical applications without the use of multiple tubing.

Tygoprene®

Tygoprene pump tubing is translucent in color and has excellent chemical resistance to a wide range of fluids, includig acids and bases. It also exhibits excellent resistance to ozone, oxygen and sunlight aging. Tygoprene tubing can be considered an alternative to silcones and PVC when longer pump tubing life is required. Typical applications include soap and detergent delivery.

Possible Reasons Tube will fail.

1. Wrong size of tube.
2. Wrong tubing material used for the chemical application (change in formulation).
3. Pump rollers need to be replaced (most common reason).
4. Wrong lubrication material used or not used at all.
5. Tube has reached its useful longevity.
6. Length of supply tube is incorrect.
7. Length and size of the output tubing is incorrect.

Philippians 4:4-6
Rejoice in the Lord always. Again I will say rejoice! Let your gentleness be known to all men. The Lord is at hand. Be anxious for nothing, but in everything by prayer and supplication, with thanks-giving, let your requests be made known to God; and the peace of God, which surpasses all understanding, will guard your hearts and minds through Christ Jesus.

Psalm 103:1-5
Bless the Lord, O my soul;
And all that is within me, bless His holy name!
Bless the Lord, O my soul;
And forget not all His benefits:
Who forgives all your iniquities,
Who heals all your diseases,
Who redeems your life from destruction,
Who crowns you with loving kindness and tender mercies,
Who satisfies your mouth with good things,
So that your youth is renewed like the eagle's.

"I believe that banking institutions are more dangerous to our liberties than standing armies. If the American people ever allow private banks to control the issue of their currency, first by inflation, then by deflation, the banks and corporations that will grow up around the banks will deprive the people of all property - until their children wake-up homeless on the continent their fathers conquered."
~Thomas Jefferson 1802
